

Accenture Hybrid Cloud Solution for Microsoft Azure

High performance. Delivered.

Under pressure to become more agile and unlock their ability to innovate faster, enterprises want to tap the full potential of the cloud to integrate the capabilities needed to become digital businesses. What's needed? A cohesive, integrated approach to the hybrid cloud.

Accenture and Microsoft are co-engineering a powerful enterprise-grade hybrid cloud platform that will unlock a new level of cloud capability for the enterprise. The **Accenture Hybrid Cloud Solution for Microsoft Azure** helps enterprises smartly connect the intelligent capabilities needed to become a digital business, giving the agility and economics of cloud computing with the reliability and security of on-premise IT environments.

The Accenture Hybrid Cloud Solution for Microsoft Azure drives a broad spectrum of business outcomes

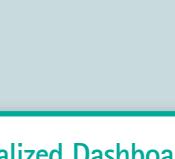

Agility and Speed

Scale on demand. Optimize for price, performance and business continuity.

Governance and Control

Security, business resiliency, and control delivered efficiently and effectively.

Cost Efficiency

Shift CAPEX to OPEX, capitalize on the new economics of cloud; ability to deliver everything as a service.

Innovation and Performance

Create new services, capabilities, hybrid applications, and exploit new business opportunities.

THE SOLUTION

Accenture Hybrid Cloud Solution for Microsoft Azure

Delivers end-to-end capabilities to help enterprises migrate at speed from the old world to the new and to get business value out of it once there.

Transformation and Deployment

Migrate and create new applications and workloads

End-to-End Spectrum of Services

Strategy

IT transformation, strategy, assessment and planning

Centralized Dashboard

Broker, manage, govern. Powered by Accenture Cloud Platform

Cloud Tooling

Software platform to orchestrate, govern and manage

Cloud and Application Managed Services

Right workloads, at the right time, at the right place

Hybrid Cloud Transformation

Transforming applications, business processes and infrastructure
